

UK Fishermen Documentary

Although the winter has almost past and the spring is around the corner, the working crews of several of our UK based Fishing Vessel Owners have had film crews on board. The Series follows a diverse range of new recruits from all over the country as they turn up at docks and training courses keen to the join the crews of Devon and Cornwall's merchant fishing fleets. The program will follow these recruits on their maiden voyages to find out what is drawing new deckhands, many of whom have no background in fishing to try their luck at sea, and whether they've got what it takes to become a bona fide trawlerman.

To be aired later this year on Channel 4 in a "prime time" slot of Thursday evenings, the Owners, Skippers and Crews were sent a selection of promotional clothing! We will confirm when the documentary is to be screened.
